STEPPED SLOPED

Custom powerlift partitions

THE SIMPLEST WAY TO

redefine

**UNIQUE SPACE.
EXCEPTIONAL DESIGN.**

Finding the right partition solution for distinctive architectural spaces that feature stepped and sloped floors is now effortless.

Thanks to their revolutionary design and unique mechanisms, Skyfold® Classic™'s stepped and sloped powerlift wall systems are the answer. From simple to highly complex room designs, dividing any space is not only possible, it can now be easily accomplished to create beautiful new spaces.

EXPLORE THE POSSIBILITIES.

In addition to meeting the unique architectural requirements of a particular space, Skyfold® Classic™'s stepped and sloped powerlift wall systems are available in a variety of finishes to meet a room's distinctive design. Finishes include vinyl, fabric, stainless steel, wood veneer, tapestry, murals, and many more.

YOUR SPACE

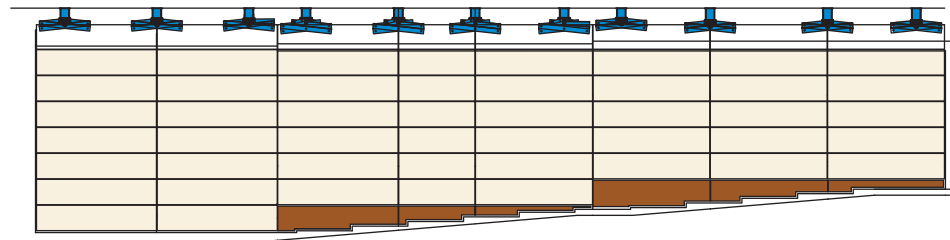

Skyfold® Classic™'s stepped and sloped powerlift walls provide state-of-the-art acoustics that allow you to carry out different activities simultaneously within the same space.

Your auditorium or classroom can be converted into 2, 3 or as many rooms as you need. Imagine conducting an exam that requires complete silence, while a choir rehearses right next door!

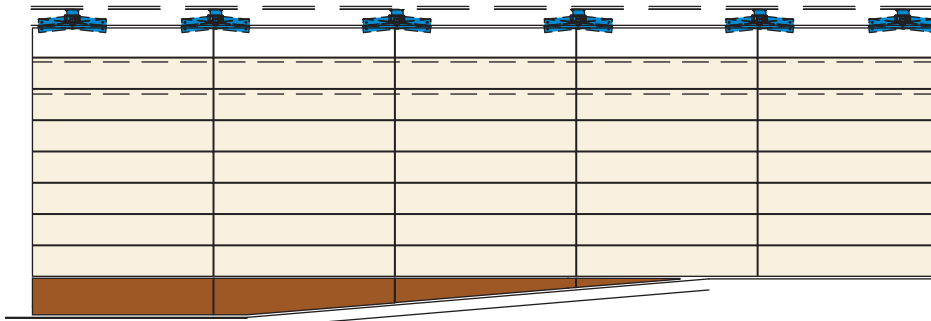

acoustical

Vertical and horizontal panel joints are aligned with steps and other architectural features in the room.

Bottom panels and seals are contoured to match the shape of the stepped or sloped floor.

power

DESIGN: FAST AND EASY

Eliminate the time consuming and tedious process of dragging large panels of varying heights along ceiling tracks to reconfigure rooms.

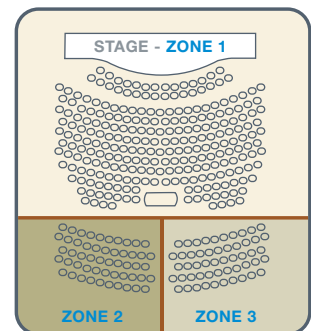

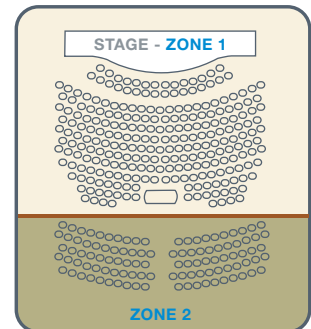

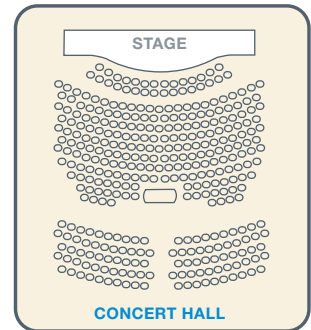

Skyfold® Classic™’s stepped and sloped powerlift walls exclusive and modern designs provide completely automatic partition solutions to room reconfigurations, thereby greatly reducing the manpower required!

Energy cost savings is another great advantage of Skyfold® Classic™'s stepped and sloped powerlift walls. The partitions are designed with resilient end seals that are extremely pliable and will seal tightly against most surfaces.

A large room that once generated high energy costs can now be converted into a smaller one that uses much less heat, air conditioning and lighting in just a few minutes!

HALL CONFIGURATIONS
 Rooms can be configured into 2, 3, 4 or even more smaller ones that function independently for course lectures, team coaching, music rehearsals, or any other type of gathering.

energy

EFFICIENT

“In situations where spaces are required to serve multiple purposes, particular partition challenges arise. In my experience, Skyfold partitions are the only technically feasible solution for the most complex room configuration and energy management goals.”

CHARLES W. HIGGERSON, RA, CONSULTING ARCHITECT, MARCH ASSOCIATES, ARCHITECTS & PLANNERS, NEW YORK

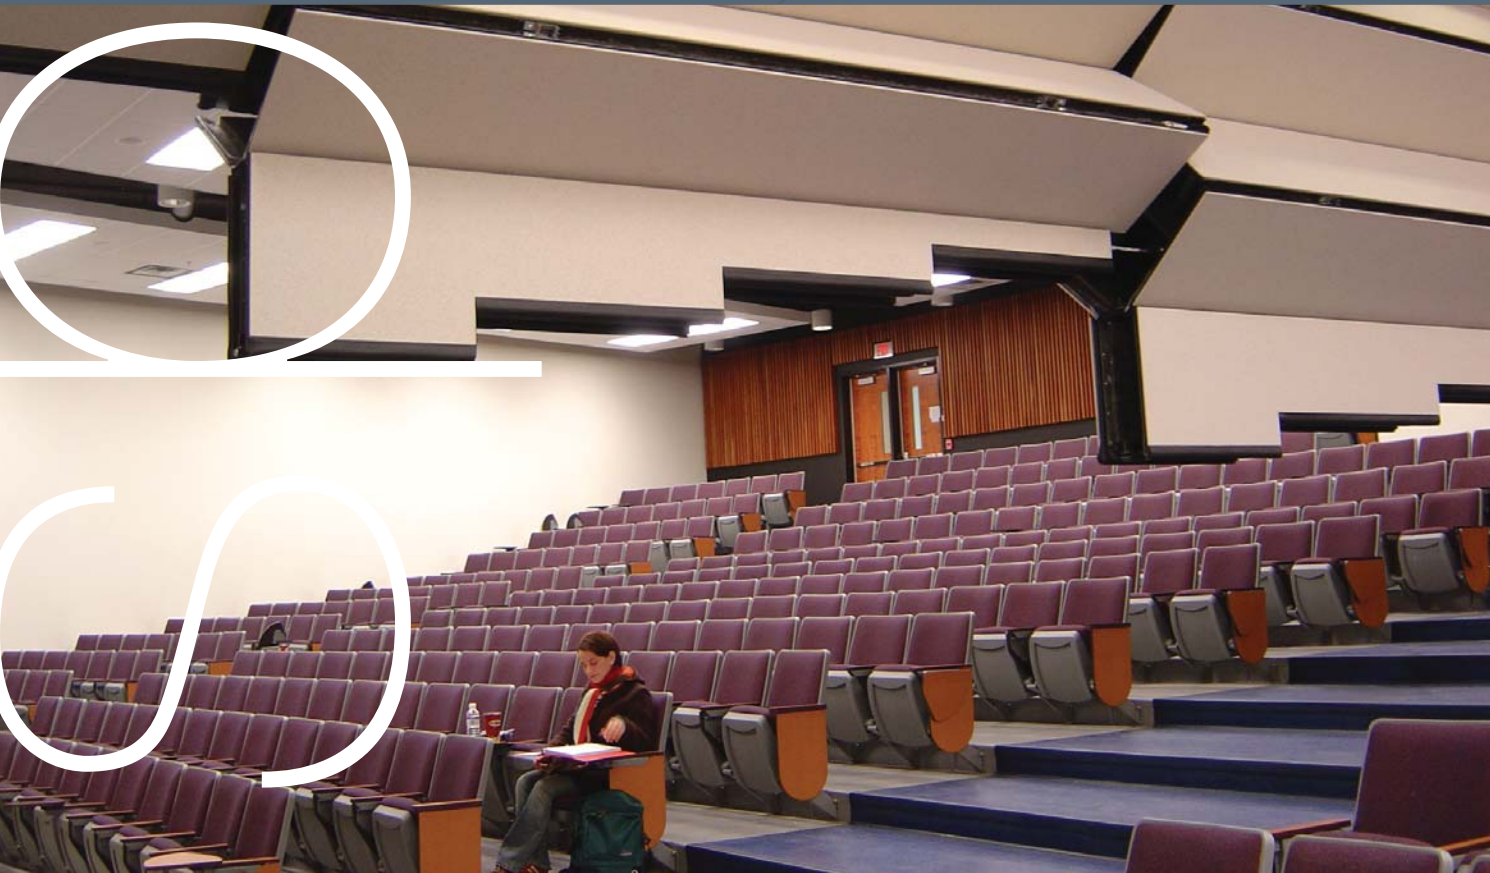

OR

"Having called upon the engineering staff at Skyfold, our architects have always found them to be extremely helpful in developing the specific dimensional folding requirements in each highly unique situation."

creation

Because Skyfold® Classic™'s stepped and sloped power-lift walls are stored in ceiling cavities, they make the most efficient use of space. Unlike traditional systems, Skyfold® eliminates the problem of where and how to store the panels when not in use without sacrificing valuable floor space. In addition, there are no tracks on the walls, ceiling or trenches in the floor to worry about!

PERFECT CLOSURE FOR ANY PROJECT

SKYFOLD®'S COMPLETE LINE OF POWERLIFT WALL SYSTEMS CAN HELP SATISFY YOUR PROJECT NEEDS. OTHER PRODUCTS INCLUDE **SKYFOLD MIRAGE®** AND **SKYFOLD® ECLIPSE™**. THE **SKYFOLD MIRAGE®** SYSTEM IS FULLY AUTOMATIC AND IS AVAILABLE IN MULTIPLE GLASS FINISHES. IT FEATURES MODERN ACOUSTICS AND COMES WITH AN OUTSTANDING BUILT-IN INFRARED SAFETY SYSTEM. THE **SKYFOLD® ECLIPSE™** IS IDEAL ANYWHERE A ROOM BARRIER IS REQUIRED. ITS PANELS ARE EXCEPTIONALLY LIGHTWEIGHT, CAN BE SOLID, MESH, OR A VARIETY OF OTHER MATERIALS, AND ARE AVAILABLE IN A VARIETY OF CONFIGURATIONS AND COMBINATIONS.

SKYFOLD® CUSTOM POWERLIFT PARTITIONS **LEED** THE WAY

Skyfold® is pleased to be an official member of the U.S. Green Building Council. The Green Council is committed to promoting better designed buildings that are not only more environmentally and socially responsible, but also help improve the quality of life for those who occupy them and the communities in which they are built. The council has developed a benchmarking system known as LEED (Leadership in Energy & Environmental Design). It has several categories and is used in evaluating the appropriateness of specific projects via a points system.

Skyfold® Custom Powerlift Partitions are constructed using as much as 97% recycled materials, offering tremendous advantages and opportunities to earn LEED points.

When it comes to recycled materials, architects and owners who choose a Skyfold® Custom Powerlift Partition system can calculate the following toward LEED accreditation on their projects.

- Recycled materials **Up to 97%**
- Post-consumer **Up to 35%**
- Pre-consumer **Up to 65%**

In order to continue protecting our environment, it is essential that we all do our part by using recycled materials whenever possible. Skyfold® is proud to help.
